ABOUT US

We are a proud family-owned and operated construction company with extensive hands-on experience in the industry. From concept to completion, we handle everything — design, planning, and full-scale construction.

Built on family values and strong craftsmanship, we're committed to delivering exceptional results with honesty, communication, and attention to detail.

ROOFING

PROJECT STAGES

A Guide On How To Work With Us

We understand the importance of clarity, collaboration, and communication when embarking on any project. Use this guide to effectively engage with our services.

1 Initial Consultation

The first step in working with us is to schedule an initial consultation. This can be done through our social media, email, or phone. During this consultation, we'll discuss your project requirements, goals, timelines, and budget.

2 Proposal / Estimate

Following the initial consultation, we'll prepare and submit a detailed proposal outlining our recommended approach, scope of work, deliverables, timeline, and cost estimate.

3 Contract

Once the proposal is approved, we'll move into the contract review and signing phase, finalizing all agreed details — including the project scope, cost, and schedule.

4 Execution and Feedback:

With a solid plan in place, we'll proceed to the execution phase. Our team will work diligently to bring your project to life, keeping you updated on progress every step of the way. We welcome your feedback throughout the process and will make any necessary revisions to ensure that the final deliverables meet your standards and objectives.

5 Payments

Upon completion of the contract review and signing, a small deposit will be required to lock your position in our schedule. The first payment will be due at the start of the project, the second at the midpoint, and the final payment upon project completion and client approval.

DESIGN SERVICE

SEE IT BEFORE WE BUILD IT !

We create stunning outdoor living designs that transform your backyard into a functional, beautiful extension of your home.
Our team provides detailed 2D layouts and realistic 3D renderings, allowing you to see your new space—down to materials, textures, colors, and landscaping—before construction even begins.

Our design process gives you clarity, confidence, and a complete visual understanding of your project, helping you make the best decisions for your space and budget.
We turn outdoor ideas into fully planned environments ready for construction.
